MEET THE MOVIE

Description:

This website hosts information related to films which includes details like Cast and Crew,Director,Music Director,Plot of the movie,Rating,links to trailer and full movie.User can have a quick search based on any of the above details.

Movies are categorised based on the genre to give user an additional edge to get to the movies of his favourite genre on one click.Genres included are Animation,Comedy,Fantasy,Horror,Romance.Once user selects a particular genre movies that are top rated in that genre are displayed to him.

User can view the rating given to a movie sofar calculated as avg of all the ratings that are given by other users.For a user to submit his rating he has to login to the website and also he should have watched the movie via the "Watch Full Movie" link on movie page.If he likes the movie,he can suggest the movie to his friends.These suggestions are displayed to his friends on their login. The current user is also shown suggestions of his friends also with the name of the friend who has suggested the movie.Suggestions are posted to user displaying movie name,genre,plot,poster and also the friend name who has suggested the movie.

Features Implemented:

➢ **Login/Register:**Users can register and login with their credentials.

➢ **Different view of HomePage for Logged & Unlogged users**: For Login users,suggestions of movies by his friends are displayed with the friend name who has suggested him the movie.For users who havenot logged in yet,top rated movies of each genre are displayed.

➢ **Movie Details Page**:Seperate page for every movie is displayed with all the information about the movie.

➢ **View movies categorised by genre**: A menu of genres is included.Once user selects a particular genre,he is displayed movies of that genre based on the rating.Top rated movies are shown first.This helps user to pick the best movie/top rated in the genre of his choice.

➢ **Search based on Movie Name/Genre/Actor:**A search bar is included to help the user search for a movie entering a keyword that matches in the details of a movie(Moviename/Genre/Actor).

➢ **Links to Cast/Crew:**User is given links to each and every member of Cast/Crew.User is redirected to wiki pages of the users on clicking their names.

➢ **Trailer:**A video of the trailer is embedded for every movie

➢ **Submit Rating of current user:**A user can submit his rating after watching the movie.

➢ **Display Rating of all users:**Rating of a movie is calculated as an average of all the ratings submitted so far.This is displayed to the user.Now,if a current user submits his/her rating the rating is recalculated and the new rating is displayed.

- **Display Number of users voted:**The number of users who have voted for a movie so far is also displayed for user to analyse on the rating wth the number of users who have given the rating.

- **Record list of users who've watched the movie:** IfWe make a record of all the users who have wacted the movie.A user is marked if he/she clicks/accesses the link to Full movie.This is implemented to avoid suggestions to a user who've already watched a movie.

- **Suggest to Friends**: A user can suggest a movie name to his/her friends provided he has watched the ovie through the "Watch Full Movie" link

- **Displaying Friend Suggestions**: To view suggestions for a him,a user has to login.On login he is shown the list of suggestions including the name of the friend who has suggested the movie.
